Frontend Developer

Highly motivated and hands-on Frontend Developer with strong experience building production-ready user interfaces using **modern JavaScript frameworks** such as **React.js/Next.js** and **Vue.js/Nuxt.js**. Skilled in developing scalable, maintainable, and performance-oriented frontend architectures, with solid experience in **state management**, **API integration (REST & GraphQL)**, and component-driven UI development. Passionate about **clean code**, performance optimization, and translating design systems into **Reusable Frontend Components**. Experienced in collaborative development environments using **Git** and **modern workflows**, with practical exposure to **CI/CD** processes. Known for strong analytical problem-solving skills, adaptability, and a continuous drive to learn and grow within frontend-focused teams.

Work Experience

Energetisch.fit

Remote, AT

Full Stack Developer

Oct 2024 – July 2025

- Resolved critical UI and data integrity issues using robust client-side validation, structured error handling, and try-catch logic, ensuring stable and smooth user interactions
- Built responsive and modular UI components with Bootstrap, Sass, and BEM, creating reusable Livewire partials to improve maintainability and development speed
- Delivered dynamic Livewire features with efficient real-time state synchronization, reducing unnecessary re-renders through component-level state management and debounce strategies

Technologies: Laravel, Livewire, MySQL, Bootstrap, Cloud Panel, GitLab, Jira, Git

Payzec

Remote, TR

Full Stack Developer

Aug 2023 – July 2025

- Built a seamless one-click checkout flow with Vue.js and Pinia, using reusable components, real-time validation, and optimized async state handling
- Developed a centralized, responsive dashboard with Vue.js and Tailwind CSS, improving abandoned cart recovery by consolidating multi-platform cart data
- Integrated WordPress plugins using RESTful APIs, custom Vue composable, and an Axios client with interceptors for reliable data synchronization and error handling
- Added offline-first capabilities and PWA enhancements using Service Workers and Firebase Cloud Messaging, increasing engagement and accessibility
- Represented the product at international events (Web Summit, Worfest), presenting the scalable frontend architecture and user-centric UI approach

Technologies: Laravel, Vue.js, Pinia, MySQL, MongoDB, Tailwind CSS, Firebase, PWA, Mailgun, Git

Alışgidiş

Frontend Developer

Istanbul, TR

Mar 2024 – July 2024

- Developed core e-commerce features for a high-traffic marketplace using Next.js, focusing on scalability, performance, and smooth user experience
- Translated pixel-perfect Figma designs into responsive, reusable UI components, establishing a component library based on Atomic Design principles
- Implemented advanced client-side state and data management using Zustand, React Context API, and TanStack Query/SWR, ensuring data consistency and minimized re-renders

Technologies: Next.js, Tailwind CSS, Figma, Zustand, Azure, Jira, Git

Patara Soft

Full Stack Developer

Remote, TR

Nov 2023 – Feb 2024

- Contributed to a modular admin panel frontend using Blade and jQuery, enhancing usability with dynamic tables, advanced filtering, and form validation
- Integrated RESTful APIs for dynamic CRUD operations via AJAX
- Added multi-language (i18n) support and SEO-friendly frontend improvements using semantic HTML and dynamic meta tags
- Streamlined image upload and management workflows with AJAX-based solutions

Technologies: Laravel, MySQL, Blade, JQuery, Ajax, Bootstrap, Eloquent ORM, Git

Kodlooper

Full Stack Developer

Sakarya, TR

Aug 2022 – Feb 2023

- Developed and maintained web applications using Nuxt.js, Vue.js, and React.js, working with SSR and SPA architectures
- Applied scalable client-side state management with Vuex and Redux Toolkit to handle complex application data
- Designed user interfaces with Tailwind CSS, Bootstrap, and Material UI, ensuring rapid prototyping, customizability, and full responsiveness to enhance visual consistency and user experience.
- Seamlessly integrated and consumed GraphQL and RESTful APIs, leveraging modern data fetching strategies to ensure efficient communication between frontend and backend.

Technologies: Laravel, MySQL, Vue.js, React.js, Nuxt.js, GraphQL, Vuex, Redux-Toolkit, Eloquent ORM, Git

Education

Anadolu University

Associate's in Computer Programming

2022 – 2024

Eskişehir Osmangazi University

Bachelor's in Civil Engineering

2017 – 2021

Certificates

- FMSS Bilişim Front-end Practicum | Patika.dev Jun 2023
- Advanced React | Meta Apr 2023
- Responsive Web Design | freeCodeCamp May 2022
- Beginner Level Frontend Web Development Path | Patika.dev Apr 2022
