## Full Stack Developer

**Highly motivated and hands-on Full Stack Developer** with a solid background in **PHP (Laravel)**, **MySQL**, and modern JavaScript frameworks including **Vue.js/Nuxt.js** and **React.js/Next.js**. I offer strong backend development expertise, **API integration** experience (including **GraphQL**), and a deep understanding of **scalable and maintainable system design**. Passionate about **clean code**, **performance optimization**, and **collaborative development** using **Git** and modern workflows. Familiar with **CI/CD principles** and continuously improving my ability to implement them effectively. Although my career began in a different field, I have swiftly transitioned into full stack development, demonstrating adaptability and a strong drive to learn. I am a self-motivated problem solver who approaches challenges analytically and thrives in team-based environments.

## Work Experience

---

### Energetisch.fit | FullStack Developer | Remote, AT

Oct 2024 – July 2025

- **Proactively resolved critical UI and data integrity bugs** through robust client-side validation, error handling, and try-catch implementations, ensuring smooth user interactions.
- **Engineered responsive and modular UI components** using Bootstrap, Sass, and BEM, developing reusable Livewire partials/components to enhance usability and maintainability.
- **Developed dynamic features with Livewire**, optimizing real-time state synchronization and minimizing frontend re-renders through component-level state management and debounce techniques for improved performance.

→ Technologies: Laravel, Livewire, MySQL, Bootstrap, Cloud Panel, GitLab, Jira, Git

### Payzec | FullStack Developer & Entrepreneur | Remote, TR

Aug 2023 – July 2025

- **Engineered a seamless one-click checkout experience** with Vue.js and Pinia, featuring a custom, reusable component with real-time validation and optimized state management for complex asynchronous operations.
- **Designed and built a centralized, responsive dashboard** using Vue.js and Tailwind CSS, significantly improving abandoned cart recovery potential by consolidating multi-platform cart data.
- **Led WordPress plugin integration**, implementing RESTful APIs, custom Vue composables, and a robust Axios client with interceptors for real-time data synchronization and advanced error handling.
- **Implemented robust offline functionality and PWA enhancements** via Service Workers, alongside Firebase Cloud Messaging for real-time push notifications, optimizing user engagement and accessibility.
- **Represented the company at international events (Web Summit, Worldef)**, effectively showcasing the project's scalable frontend architecture and user-centric UI.

→ Technologies: Laravel, Vue.js, Pinia, MySQL, MongoDB, Tailwind CSS, Firebase, PWA, Mailgun, Git

### Alışgidiş | Frontend Developer | İstanbul, TR

Mar 2024 – July 2024

- **Engineered core e-commerce features for a high-traffic marketplace using Next.js**, focusing on **scalability and performance** through Code Splitting, Image Optimization, and dynamic routing, while enhancing user experience with **skeleton screens and optimized loading states**.
- **Translated pixel-perfect Figma designs into responsive, dynamic, and reusable UI components**, establishing a **Component Library** and applying **Atomic Design principles** for visual consistency and maintainability

- **Architected and implemented advanced client-side state and data management solutions using Zustand, React Context API, and Tanstack Query/SWR.** This included enabling **real-time product updates** via polling, effectively **minimizing re-renders** with memoization techniques, and ensuring data consistency across the application.

→ Technologies: Next.js, Tailwind CSS, Figma, Zustand, Azure, Jira, Git

#### **Patara Soft | FullStack Developer | Remote, TR**

Nov 2023 – Feb 2024

- **Contributed to the development of a comprehensive, modular admin panel Frontend** using Blade and jQuery, focusing on enhancing user experience with features like dynamic tables, advanced filtering, and user-friendly form validation.
- **Integrated RESTful APIs for dynamic CRUD operations**, leveraging AJAX for efficient asynchronous data management and real-time UI updates.
- **Implemented robust multi-language support (i18n) and SEO-friendly Frontend features** (semantic HTML, dynamic meta tags) to optimize global reach and search engine visibility.
- **Developed AJAX-based solutions for efficient image upload and management**, streamlining media handling workflows.

→ Technologies: Laravel, MySQL, Blade, JQuery, Ajax, Bootstrap, Eloquent ORM, Git

#### **Kodlooper | FullStack Developer | Sakarya, TR**

Aug 2022 – Feb 2023

- **Developed and maintained web applications using multiple modern JavaScript frameworks** (Nuxt.js, Vue.js, React.js), focusing on SSR, SPA architectures, and dynamic, interactive user interfaces.
- **Implemented comprehensive and scalable client-side state management** using Vuex and Redux-Toolkit to efficiently manage complex application data and optimize data flow.
- **Designed user interfaces with Tailwind CSS, Bootstrap, and Material UI**, ensuring rapid prototyping, customizability, and full responsiveness to enhance visual consistency and user experience.
- **Seamlessly integrated and consumed GraphQL and RESTful APIs**, leveraging modern data fetching strategies to ensure efficient communication between frontend and backend.

→ Technologies: Laravel, MySQL, Vue.js, React.js, Nuxt.js, GraphQL, Vuex, Redux-Toolkit, Eloquent ORM, Git

## **Education**

---

### **Eskişehir Osmangazi University**

2017 – 2021

Bachelor's in Civil Engineering

### **Anadolu University**

2022 – 2024

Associate's in Computer Programming

## **Certificates**

---

- **FMSS Bilişim Front-end Practicum | Patika.dev** Jun 2023
- **Advanced React | Meta** Apr 2023
- **Responsive Web Design | freeCodeCamp** May 2022
- **Beginner Level Frontend Web Development Path | Patika.dev** Apr 2022

## **Reference**

---

Ömer Gülcük → Machinarium → Frontend Team Lead

Osman Feyyaz Onur → Getir → iOS Developer
